

Data Collection and Preprocessing Phase

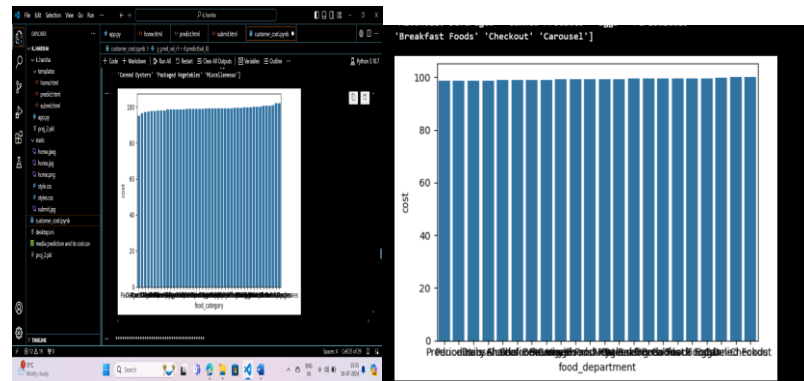

Date	20 June 2024
Team ID	739986
Project Title	Customer Acquisition cost estimation using Machine Learning.
Maximum Marks	6 Marks

Data Exploration and Preprocessing Report

Dataset variables will be statistically analysed to identify patterns and outliers, with Python employed for preprocessing tasks like normalization and feature engineering. Data cleaning will address missing values and outliers, ensuring quality for subsequent analysis and modeling, and forming a strong foundation for insights and predictions.

Section	Description
